## \* \* \*Section 5 - FIRE-FIGHTING MEASURES\* \* \*

#### Suitable Extinguishing Media

Dry chemical, carbon dioxide, foam, water spray

#### **Unsuitable Extinguishing Media**

Do not use high-pressure water streams.

#### Special Hazard Arising from the Chemical

Avoid generating vapors; vapors dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential explosion hazard. Vapors are heavier than air and can collect in low areas; vapors can travel to an ignition source and flash back

**Combustion:** Upon combustion, this product emits carbon monoxide, carbon dioxide and/or low molecular weight hydrocarbons.

#### **Fire Fighting Measures**

Keep away from sources of ignition. Avoid inhalation of material or combustion by-products. Move material from fire area if it can be done without risk. Use extinguishing agents appropriate for surrounding fire. Dike for later disposal. Stay upwind and keep out of low areas.

#### Special Protective Equipment and Precautions for Firefighters

Wear full protective fire fighting gear including self contained breathing apparatus (SCBA) for protection against possible exposure.

## \* \* \*Section 6 - ACCIDENTAL RELEASE MEASURES\* \* \*

### Personal Precautions, Protective Equipment and Emergency Procedures

Wear appropriate personal protective equipment. Keep unnecessary people away, isolate hazard area and deny entry. Avoid contact with skin and eyes. Avoid release to the environment. Only personnel trained for the hazards of this material should perform clean up and disposal.

#### Methods and Materials for Containment and Cleaning Up

Use non-sparking tools and equipment. Keep unnecessary people away, isolate hazard area and deny entry. Absorb with sand or other non-combustible material. Keep out of water supplies, sewers and soil. Collect spilled material in appropriate container for disposal. In case of spillage, stop the flow of material and block any potential routes to water systems.

## \* \* \*Section 7 - HANDLING AND STORAGE\* \* \*

#### **Precautions for Safe Handling**

Keep away from heat, sparks, open flame, and hot surfaces - No smoking. Wear protective gloves and eye/face protection. Keep away from all ignition sources. Avoid contact with skin and eyes. Always wear recommended personal protective equipment. Wear personal protective clothing and equipment, see Section 8. Take precautionary measures against static discharge. Dissipate static electricity during transfer by earthing (grounding and bonding) containers and equipment. Do not breathe vapor or mist.

#### Conditions for Safe Storage, including any Incompatibilities

Store in a cool, dry place. Store in a well-ventilated area. Avoid contact with molten (hot) material. Keep separated from incompatible substances. Keep container tightly closed. Empty containers may contain product residue. Do not reuse empty containers without commercial cleaning or reconditioning. Store and handle in accordance with all current regulations and standards.

Incompatibilities: strong oxidizing materials, combustible materials

## \* \* \*Section 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION\* \* \*

## **Component Exposure Limits:**

None

## **Appropriate Engineering Controls**

Provide a local exhaust ventilation system. Ventilation equipment should be explosion-resistant if explosive concentrations of material are present. It is recommended that all vapor control equipment such as local exhaust ventilation and material transport systems involved in handling of these product contain explosion relief vents or an explosion suppression system or an oxygen-deficient environment. Ensure that vapor-handling systems (such as exhaust ducts, vessels, and processing equipment) are designed in a manner to prevent the escape of vapors into the work area (i.e., there is no leakage from the equipment). Use only appropriately classified electrical equipment and powered industrial trucks.

#### Individual Protection Measures, such as Personal Protective Equipment

## **Eyes/Face Protection**

Wear splash resistant safety goggles with a face shield.

#### **Skin Protection**

Wear appropriate chemical resistant clothing.

Material Name: Hydrocarbon Resin

CUMAR® R-29-10° Resin

#### **Glove Recommendations**

Wear appropriate chemical resistant gloves.

## **Respiratory Protection**

A NIOSH approved respirator with organic vapor cartridges and N95 filters may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits, or when symptoms have been observed that are indicative of overexposure.
