#### MATERIAL SAFET Y DATA SHEET

### CARBON BLACK

(ISO 11014-1 / ANSI Z 400.1-1998 / 93/112/EC)

First issue: June 17, 1999

Revision date: November 20, 2003

NOTE: Added new grades, Section I only

Herb Harless Manager EH&S 817-338-8386

Manufacturer/supplier:

Sid Richardson Carbon Co.

Company name:

Sid Richardson Carbon Co.

Company mailing address: 3560 W. Market St., Suite 420

Akron, OH 44333

**Emergency Phone No.:** 

(330) 666-2777 – Day

(800) 767-2227 - Night/Weekend

[for foreign distribution indicate country code, e.g., US (01)]

Optional emergency number(s):

CHEMTREC: 1-800-424-9300 (US)

CANUTEC: 613-996-6666 (Canada)

Common Name, Chemical Name or Trade Name:

**CARBON BLACK:** 

The following grades and also other grades with similar properties when manufactured by the oil furnace processes used by Sid Richardson Carbon Co. (SRCC):

N110	N134	N231	N326	N343	N358	N660	N774	SR 310	SR 630
N120	N135	N234	N330	N347	N550	N762	SR155	SR 511	SR 730
N121	N220	N299	N339	N351	N650	N772	SR 301	SR 530	

#### 2.1 Component(s):

Carbon Black, amorphous (100%)

Chemical formula:

C

CAS number:

1333-86-4

EINECS number:

215-609-9

#### 2.2 **OSHA Regulatory Status:**

This material is classified as hazardous under OSHA regulations.

## **MATERIAL SAFETY DATA SHEET**

#### CARBON BLACK

(ISO 11014-1 / ANSI Z 400.1-1998 / 93/112/EC)

## 3.1 Emergency Overview

A black, odorless powder, which can burn or smolder at temperatures greater than 572°F (>300°C). Hazardous products of decomposition can include carbon monoxide, carbon dioxide, and oxides of sulfur. May cause mechanical irritation to the eyes and the respiratory tract especially at concentrations above the occupational exposure limit. Some grades of carbon black are sufficiently electrically non-conductive to allow a buildup of static charge during handling. Take measures to prevent the build up of electrostatic charge.

#### 3.2 Product Classification

EU: Not defined as a dangerous substance or preparation according to Council
Directive 67/548/EEC and its various amendments and adaptations
WHMIS: This material is classified as D2A under Canadian Worker
Hazardous Materials Information System (WHMIS) criteria

3.3 Routes of Exposure: Inhalation, Eye and Skin

## 3.4 Potential Health Effects:

Inhalation: Temporary discomfort to upper respiratory tract may occur due to mechanical irritation when exposures are well above the occupational exposure limit. Long-term exposure may result in a small non-clinically significant increase in normal loss in one aspect of lung function (FEV<sub>1</sub>). See Section 11.

Ingestion: No evidence of adverse effects from available data.

Eye: High dust concentrations may cause mechanical irritation to eye.

Skin: May cause mechanical irritation, soiling and drying of skin.

Sensitization: No cases of sensitization in humans have been reported

Chronic: IARC listed; Group 2B (possibly carcinogenic to humans). Not listed as a carcinogen by NTP, ACGIH, OSHA or the European Union. See Section 11.

There are no known human carcinogenic effects related to the PAH content of carbon blacks. Recent research has shown that the PAH content of carbon blacks is not released from carbon black in biological fluids and thus not available for biological activity.

### 3.5 Potential Environmental Effects:

No significant environmental hazards are associated with carbon black release to the environment. Carbon black is not soluble in water. See Section 12.

# MATERIAL SAFETY DATA SHEET

## CARBON BLACK

(ISO 11014-1 / ANSI Z 400.1-1998 / 93/112/EC)

## 4.1 First aid procedures:

Inhalation:

Take affected persons out in fresh air, if necessary.

Skin:

Wash skin with mild soap and water. If symptoms develop, seek

medical attention.

Eye:

Rinse eyes thoroughly with plenty of water keeping eyelid open. If

symptoms develop, seek medical attention.

Ingestion:

Do not induce vomiting. If conscious, rinse mouth with water.

4.2 Note to physicians: Treat symptomatically.

## **MATERIAL SAFETY DATA SHEET**

#### CARBON BLACK

(ISO 11014-1 / ANSI Z 400.1-1998 / 93/112/EC)

### 5.2 Extinguishing Media:

Use foam, carbon dioxide (co2), dry chemical, or water spray. Avoid high-pressure water stream as this may spread burning powder (burning powder will float). A fog spray is recommended if water is used. NOTE: It may not be obvious that carbon black is burning unless the material is stirred and sparks are apparent. Carbon black that has been on fire should be observed closely for at least 48 hours to ensure no smoldering material is present.

## 5.3 Protection of Firefighters:

Products of combustion include carbon monoxide (CO), carbon dioxide (CO2), and oxides of sulfur. Wear full protective fire fighting gear including self-contained breathing apparatus (SCBA).

## 5.4 Static Charge Effects:

Some grades of carbon black are sufficiently electrically non-conductive to allow a build-up of a static charge during handling.

NOTE: Wet carbon black produces dangerously slippery walking surfaces. Small spills should be vacuumed when possible. Dry sweeping is not recommended. A vacuum equipped with HEPA (high efficiency particulate air) filtration is recommended. If necessary, light water spray will reduce dust for dry sweeping. Large spills may be shoveled into containers. See Section 13. Wear appropriate personal protective equipment and respiratory protection. See Section 8.

Carbon black poses no significant environmental hazards. As a matter of good practice, minimize contamination of sewage water, soil, groundwater, drainage systems, or bodies of water.

### 7.1 Handling:

Marian de la companie de la companie

Avoid dust exposures above the occupational exposure limit. Wash exposed skin daily. Use local exhaust ventilation to control exposures to below occupational exposure limit. Fine dust may cause electrical shorts and is capable of penetrating electrical equipment unless tightly sealed. If hot work (welding, torch cutting, etc.) is required the immediate work area must be cleared of carbon black product and dust.

### 7.2 Storage:

Store in dry place away from ignition sources and strong oxidizers. Before entering closed vessels and confined spaces containing carbon black test for adequate oxygen, flammable gases and potential toxic air contaminants (e.g., CO). Follow safe practices when entering confined spaces.

# **MATERIAL SAFETY DATA SHEET**

## **CARBON BLACK**

(ISO 11014-1 / ANSI Z 400.1-1998 / 93/112/EC)

## 8.1 Engineering Controls:

Use process enclosures and/or exhaust ventilation to keep airborne dust concentrations below the occupational exposure limit.

## 8.2 Personal Protective Equipment (PPE):

rak Basiasa karang ang kulink norta lakolak au

No special PPE required. Gloves may be used to protect hands from carbon black soiling. Work clothes should <u>not</u> be taken home and should be washed daily.

Skin Protection: Wash hands and other exposed skin with mild soap and use skin cream to prevent skin drying.

Respiratory Protection: An approved air-purifying respirator (APR) may be used where airborne concentrations are expected to exceed occupational exposure limits. Protection provided by APRs is limited. Use a positive-pressure, air supplied respirator if there is any potential for uncontrolled release, exposure levels are not known, or any circumstances where air-purifying respirators may not provide adequate protection. A complete respiratory protection program in accordance with national standards and current best practices must accompany use of any respirator.

The following agencies/organizations approve respirators and/or criteria for respirator programs:

U.S.:

NIOSH approval under 42 CFR 84 required.

OSHA (29 CFR 1910.134, effective 8 Apr.98). ANSI Z88.2-1992, Respiratory Protection.

EU:

CR592, Guidelines for the Selection and Use of

Respiratory Protection.

Germany:

DIN/EN 143, Respiratory Protective Devices for Dusty

Materials.

UK:

BS 4275, Recommendations for the Selection, Use and Maintenance of Respiratory Protective Equipment.

HSE Guidance Note HS(G)53 Respiratory Protective

Equipment.

General Hygiene Considerations: Wash hands and face thoroughly with mild soap before eating and drinking. Frequent skin washing may dry skin. Application of a skin lotion is recommended.

Eye protection recommended as a matter of good industrial safety practice.

# **MATERIAL SAFETY DATA SHEET**

## **CARBON BLACK**

(ISO 11014-1 / ANSI Z 400.1-1998 / 93/112/EC)

## 8.3 Exposure Guidelines:

	Occupational Exposure				
<b>Country</b>	Limit, mg/m <sup>3</sup>				
Australia	3.0 TWA				
United States					
OSHA-PEL	3.5 TWA				
ACGIH-TLV	3.5 TWA				
NIOSH -REL	3.5 TWA (see Section 11)				
Germany					
MAKs	1.5 respirable TWA*				
	4.0 inhalable TWA*				
TRGS 900	6.0 respirable TWA*				
Canada	3.5 TWA				
United Kingdom	3.5 TWA				
	7.0 STEL, 10 minutes				
France	3.5 TWA				
Sweden	3.0 TWA				
Korea	3.5 TWA				

TWA = 8-hour time weighted average. STEL = short-term exposure limit. PEL = permissible exposure limit. REL = recommended exposure limit. MAK = maximum concentration values in the workplace Contact your carbon black supplier for additional information on occupational exposure levels.

\*For particulates not otherwise classified (PNOC).

### CARBON BLACK

(ISO 11014-1 / ANSI Z 400.1-1998 / 93/112/EC)

Stability: stable under normal ambient conditions

Decomposition: >572°F (>300°C)

NO CONTRACTOR OF THE PROPERTY OF THE PROPERTY

Conditions to avoid: exposure to high temp. >572°F (>300°C) and open flames.

Materials to avoid: strong oxidizers such as chlorates, bromates, and nitrates.

Hazardous decomposition products: carbon monoxide, carbon dioxide, organic products of decomposition, oxides or sulfur (sulfoxides) form if heated above

decomposition temperature.

Hazardous polymerization:

Will not occur.

## 11.1 Acute Toxicity:

Acute Oral Toxicity:  $LD_{50}$  (rat), > 8000 mg/kg Acute Dermal Toxicity:  $LD_{50}$  – not available Acute Inhalation Toxicity:  $LC_{50}$  – not available

Primary Skin Irritation: (rabbit), non-irritative, index score 0.6/8 (4.0 =

severe edema)

PERSONAL PROPERTY OF THE CONTROL OF THE PROPERTY OF THE PROPER

Primary Eye Irritation: (rabbit), non-irritative, Draize score 10-17/110 (100 = maximally irritating)

## 11.2 Subchronic Toxicity:

Rat, inhalation, duration 90 days, NOAEL = 1.0 mg/m<sup>3</sup>

Target organ: lungs

Effect: inflammation, hyperplasia, fibrosis

## 11.3 Chronic Toxicity:

Rat, oral, duration 2 years - Effect: no tumors
Mouse, oral, duration 2 years - Effect: no tumors

Mouse, dermal, duration 18 months - Effect: no skin tumors

Rat, inhalation, duration: 2 years - Effect: inflammation, fibrosis, tumors

Target organ: Lungs.

Note: Tumors in the rat lung are considered to be related to the "particle overload phenomenon" rather than to a specific chemical effect of carbon black itself in the lung. These effects in rats have been reported in many studies on other inorganic insoluble particles and appear to be rat specific. Tumors have not been observed in other species (i.e., mouse and hamster) for carbon black or other insoluble particles under similar circumstances and study conditions.

# **MATERIAL SAFETY DATA SHEET**

### **CARBON BLACK**

(ISO 11014-1 / ANSI Z 400.1-1998 / 93/112/EC)

## 11.4 Carcinogenicity:

In 1995 International Agency for Research on Cancer (IARC) concluded, "There is inadequate evidence in humans for the carcinogenicity of carbon black." Based on rat inhalation studies, IARC concluded that there is, "sufficient evidence in experimental animals for the carcinogenicity of carbon black," resulting in their classifying carbon black as "possibly carcinogenic to humans (Group 2B)".

Carbon black is not designated a carcinogen by the U.S. National Toxicology Program (NTP), the U.S. Occupational Safety and Health Administration (OSHA), the American Conference of Governmental Industrial Hygienists (ACGIH) or the European Union (EU).

## 11.5 Sensitization: No animal data available

## 11.6 Mutagenic effects:

In an experimental investigation, mutational changes in the *hprt* gene were reported in alveolar epithelial cells in the rat following inhalation exposure to carbon black. This observation is believed to be rat specific and a consequence of "lung overload" which led to chronic inflammation and release of oxygen species. (see Chronic toxicity above). This is thus considered to be a secondary genotoxic effect and thus carbon black itself would not be considered to be mutagenic.

## 11.7 Reproductive effects: No effects reported in long-term animal studies.

#### 11.8 Epidemiology:

Results of epidemiological studies of carbon black production workers suggest that cumulative exposure to carbon black may result in small decrements in lung function, as measured by FEV<sub>1</sub>. A recent U.S. respiratory morbidity study suggested a 27 ml decline in FEV1 from a 1-mg/m3 exposure over a 40-year period. An older European investigation suggested an exposure to 1 mg/m³ (inhalable fraction) of carbon black over a 40-year working-lifetime would result in a 48ml decline in FEV<sub>1</sub>. In contrast, normal age related decline over a similar period of time would be approximately 1200 ml.

The relationship between symptoms and working lifetime exposure to carbon black is less clear. In the U.S. study, 9% of the highest exposure group (in contrast to 5% of the unexposed group) reported symptoms consistent with chronic bronchitis. In the recent U.S. study no links were noted between current exposure levels and decrements in lung function and symptoms.

A study of carbon black workers in the UK showed an elevated incidence of lung cancer but it was not considered to be related to carbon black.

## **MATERIAL SAFETY DATA SHEET**

#### CARBON BLACK

(ISO 11014-1 / ANSI Z 400.1-1998 / 93/112/EC)

Results of epidemiological studies of carbon black production workers suggest that cumulative exposure to carbon black may result in small decrements in lung function, as measured by FEV<sub>1</sub>. According to a European investigation, exposure to 1 mg/m<sup>3</sup> (inhalable fraction) of carbon black over a 40-year lifetime will result in a 48-milliliter (ml) decline in FEV<sub>1</sub>. In contrast, normal age related decline over a similar period of time would be approximately 1200 ml. A similar morbidity study in the United States suggested a 27 ml decline in FEV<sub>1</sub> from a lmg/m<sup>3</sup> exposure (inhalable fraction) over a 40 year period.

The relationship between symptoms and exposure to carbon black is less clear. I the U.S. study, 9% of the highest exposure group (in contrast to 5% of the unexposed group) reported symptoms consistent with chronic bronchitis. In the European study, methodological limitations in the administration of the questionnaire limit the drawing of definitive conclusions about symptoms. This study, however, indicated a link between carbon black and small opacities on the chest films, with negligible effects on lung function.

## **Ecotoxicity:**

Aquatic toxicity: Acute fish toxicity: LC50 (96 h) > 1000mg/l,

Brachydanio rerio (zebrafish), (OECD Guideline 203).

Acute water flea toxicity: EC50 (24 h) > 5600 mg/l.

Daphnia magna (waterflea), (OECD Guideline 202).

Acute algae toxicity: EC 50 (72 h) >10,000 mg/l NOEC 50 ≥10,000

mg/l (Scenedesmus subspicatus), (OECD Guideline 201)

Behavior in water treatment plants: Activated sludge, EC0 (3 h) >= 800

mg/l. DEV L3 (TTC test)

Mobility: Not soluble in water.

Bioaccumulation: Potential bioaccumulation is not expected because of physio-chemical properties of the substance.

## Professional Constitution of the Constitution

Product can be burned in suitable incineration plants or disposed of in a suitable landfill in accordance with the regulations of the appropriate federal, provincial, state and local authorities.

EU: See European Waste Catalogue (Council Directive 75/422/EEC).

U.S.: Not a hazardous waste under U.S. RCRA, 40 CFR 261.

Canada: Not a hazardous waste under provincial regulations.

Container/Packaging: Return reusable containers to manufacturer. Paper bags may be incinerated, recycled, or disposed of in an appropriate landfill in

### 15.4 United States:

## Federal Regulations

Superfund Amendments and Reauthorization Act (SARA) Title III Section 313 Toxic Substances: Does not contain any components subject to this section.

Toxic Release Inventory (TRI): Under EPA's Toxics Release Inventory (TRI) program the reporting threshold for 21 Polycyclic Aromatic Compounds (PACs) has been lowered to 100 pounds per year manufactured, processed, or otherwise used. (64 CFR 58666, Oct. 29, 1999) The 100 pounds/yr applies to the cumulative total of 21 specific PACs. Carbon black may contain certain of these PACs and the user is advised to evaluate their own TRI reporting responsibilities.

## State Regulations

California Safe Drinking Water and Toxics Enforcement Act of 1986 (Proposition 65):

"Carbon black (airborne, unbound particles of respirable size)" is a California Proposition 65 listed substance. All three listing qualifiers (airborne, unbound (not bound within a matrix), and respirable size (10 micrometers or less in diameter)) must be met for this substance to be considered a Proposition 65 listed substance.

### 15.5 Inventory Status:

All components either are listed on or exempt from the following inventories:

European Union: European Inventory of Existing Commercial Chemical Substances (EINECS) No. 215-609-9.

Australia: Australian Inventory of Chemical Substances (AICS)

Canada: Domestic Substances List (DSL)

Japan: Existing and New Chemical Substances (ENCS) No. 5-3328.

Korea: Existing Chemical Substances List (ECL) No. KE-04882

Philippines: Philippine Inventory of Chemicals and Chemical Substances (PICCS)

China: Inventory of Existing Chemical Substances

United States: Toxic Substances Control Act (TSCA)

16.1 Polycyclic Aromatic Hydrocarbon (PAH) Content. Manufactured carbon blacks generally contain less than 0.1% of solvent extractable polycyclic aromatic hydrocarbons (PAH). Solvent extractable PAH content depends on numerous factors including, but not limited to, the manufacturing process, desired product specifications, and the analytical procedure used to measure and identify solvent extractable materials.

Questions concerning PAH content of carbon black and analytical procedures should be addressed to your carbon black supplier.

16.2 National Fire Protection Association (NFPA) Rating:

Health: 1
Flammability: 1
Reactivity: 0

THE REMODERATION OF THE

0 = minimal, 1 = slight, 2 = moderate, 3 = serious, 4 = severe
