

ZINC OXIDE
GRADE AZO66

Description & Uses

Grade AZO66 is an extremely pure French Process, statistically controlled zinc oxide produced from zinc metal. AZO66 provides superior color and is highly efficient in light colored or white goods. This grade is used in the zinc chemical, oil additive, ceramic, paint/coating industries and in those applications where high purity is critical. Grade AZO66 is available with surface treatment (AZO66T) and in a pelleted form (AZO66P).
